TECHNICAL SKILLS

.NET & Backend

C#, .NET Framework 4.6+, .NET 8
ASP.NET MVC 5, Web API 2
ADO.NET · LINQ · Entity
Framework 6/8
ASP.NET Identity, OAuth 2.0,
OWIN

Web & UI

HTML5, CSS3, Bootstrap
JavaScript · jQuery · AJAX
Razor Views

WebService / API

WebService / WCF / SOAP
RESTful API, RestSharp
XML signing, webhook

Database

SQL Server 2016 — stored procs,
indexing, transactions, multi-
tenant
MySQL
Oracle / PL/SQL: learning

Architecture & OOP

OOP, SOLID, MVC
Layered:
Controller→Service→Biz→DAL
RBAC, async queue

Libraries & Tools

EPPlus · iTextSharp · Redis
VS 2022, Git, IIS, SSMS, Postman

CERTIFICATIONS &
AWARDS

TOEIC 595

Feb 2024

TECHWIZ 4 — 2024

Web Application Development

CAREER OBJECTIVE

.NET Developer with **2+ years of hands-on experience** building and maintaining enterprise web applications: ASP.NET MVC 5 / Web API 2, ADO.NET + LINQ + Entity Framework, jQuery / AJAX, SQL Server and multi-system Webservice integration. Looking to contribute directly to production projects from day one, with a strong focus on business logic, data access and third-party integration.

WORK EXPERIENCE

IT Developer — .NET / C#

May 2024 – Present · 2 years

idocNet

Developed and maintained 4 enterprise systems: DMS Sale (Hyundai vehicle distribution, 80+ dealers), TVAN V22 (e-invoice platform), idn.CarService (service & repair management), InBrand (product traceability).

83	17	12	5
Business Modules	Scheduled Jobs/day	3rd-party Integrations	Bank APIs

- Built and maintained **ASP.NET MVC 5 / Web API 2** (.NET 4.6+) following a layered architecture: Controller → Service → Biz → DAL; collaborated with BAs on requirements analysis and system design.
- Built dynamic UIs using **jQuery / AJAX**: form submission without page reload, auto-refreshing data tables, combined client + server-side validation.
- Data access via **ADO.NET + LINQ + Entity Framework**: DataTable/DataSet for legacy queries, EF model-first for new modules; temp-table paging for large datasets.
- Wrote and optimised **T-SQL stored procedures** on multi-tenant SQL Server: composite indexes, row-lock transactions, temp-table paging — no timeout on large result sets.
- Integrated **WebService / SOAP / REST** endpoints: SSO OAuth 2.0, 5 bank APIs, e-invoice gateway EFY/TCT (XML signing, response codes 200 / 202 / 204 / 301).
- Generated **Excel reports (EPPlus)** and **PDF documents (iTextSharp)**; implemented 3-axis RBAC (Role × Organisation × Function) for row-level access control.

Intern — Software Development

Sep 2022 – May 2024

IPPG

- Assisted in coding features, fixing UI bugs and writing SQL queries for reports; built foundational skills in C#, ASP.NET MVC and SQL Server in a real business environment.

PERSONAL PROJECTS

Student Management System

github.com/Tranletrungkien1705/project3-aptech-dotnet

ASP.NET MVC · Entity Framework · ASP.NET Identity · SQL Server

5-role web app (Admin / Teacher / Student / Teaching Assistant / Parent): class & schedule management, assignments, grading. Clean Architecture + RBAC + authentication.

MiniDMS — Inventory & Order Management

github.com/Tranletrungkien1705/MiniDMS

ASP.NET Core 8 MVC · Entity Framework Core 8 · ASP.NET Identity · EPPlus

Inventory + order + debt management web app with **RBAC 4 roles** (Admin / Warehouse / Sales / Accounting), bulk Excel import, report export.

EDUCATION

Bachelor of Information Technology

Lincoln University College | Sep 2021 – Dec 2025

GPA: 3.0 / 4.0
